Effective Communication	

Projects

ATMSimulator | [Link](#) JAVA, MySQL

An ATM Simulator System replicates ATM operations, such as balance inquiries, cash withdrawals, deposits, and PIN changes. In Java, it interacts with a MySQL database to securely manage user accounts and transactions.

BankQ | [Link](#) React, JAVA, JSP, MySQL

BankQ is a public-oriented digital portal designed to streamline banking services for citizens by enabling online slot booking for essential services such as deposits, withdrawals, and document updates. This platform empowers users to access services at their convenience, ensuring efficient queue management and promoting social distancing.

AgriSetu | [Link](#) Bootstrap, React.js, Node.js, MySQL

AgriSetu is a modern, digital marketplace designed to empower farmers by providing a direct platform to upload and sell fresh vegetables in bulk to wholesale traders. Farmers can easily upload vegetable details, including name, quantity, price per kilogram, and location, along with images.

Experience

BharatIntern: Two-month internship at BharatIntern in Frontend Development

CodeSoft: Two-month internship at CodeSoft in Frontend Development

Certifications

Advanced JAVA, JSP – Web Jyoti
MySQL, MongoDB, Web Development – Coding Blocks
JavaScript, React – KG Coding
Oops in C++ - Scalar
Oops in JAVA - Great Learning Basic
Problem-Solving Skills - LeetCode
